GenComm – Testing Your System

- DRMS has set up a parallel system for use when a new application is being designed or a change to a current application requires testing to ensure that your output meets the GenComm Standards.
- GenComm is setup to handle either XML or bar delimited files coming through the same address.
- Prior to uploading test files, please contact DRMS to coordinate the test to ensure that we have the resources available to support your test. We will need a Point Of Contact, to be responsible for working through errors. Please coordinate your test with

  Robert Knapp 1-269-961-5074

  Roxanne Plane 1-269-961-5899

GenComm – Testing Your System

- The test system contains a limited number of databases. For test purposes, you must use a Routing Indicator Code and Suffix of SXGA. The Routing Indicator Code and Suffix must be in the file header.
- If your system uses the DRMOGen file, please inform DRMS, that you will need DRMOGen files returned. If you do not inform us, we will not prepare DRMOGen files and that portion of your system will not be tested.
- Files can contain:

  DTID only

  HWPS only

  Combination of DTID & HWPS Information

GenComm – Testing Your System

- If you are sending Hazardous Waste Profile Sheets in your file, we only need the Waste Profile Sheet sent once.

Example – if several 1348s in the same file reference the Waste Profile Sheet, we only need to receive it once.

GenComm – Sending Test Files Via E-Mail

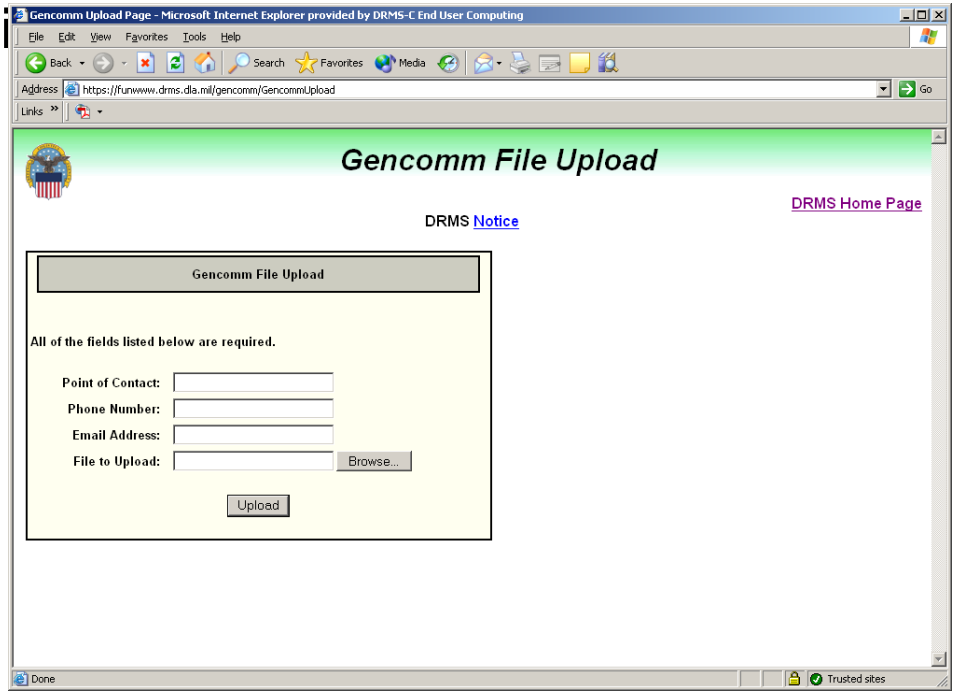
- Email Address: gencomm@genfnc.drms.dla.mil

- Subject Line: File Name
  Recommended naming convention:
  DoDAAC.Julian Date
  Example: SH5400.3192

- File as Attachment

- Nothing in the body of the e-mail except the attachment. NO pictures, NO signatures, NO background, plain text or XML (tags & schema must match our schema), NO encryption

GenComm – Sending Test Files Via Upload

- Upload files to: https://webfnc.drms.dla.mil/gencomm/GencommUpload


- Fill in Point of Contact, Phone Number, E-mail Address, Browse to pi
